

STEPHENSON GOBIN

# REACH COMPLIANCE DECLARATION

Stephenson Gobin Limited is fully aware and understands the aspects and impacts of the EU and UK regulations on the Registration, Evaluation and Authorization of Chemicals (REACH) and the candidate list of 240 substances of very high concern (SVHC).

Pursuant to the European Union Registration, Evaluation Authorization of Chemicals Regulation 1907/2006/EC (REACH) and UK REACH. Stephenson Gobin Limited has an obligation to inform about certain substances contained in articles manufactured in or imported into the UK and European Union.

Where an article contains any substances of very high concern (SVHC) and is identified in a concentration above 0.1 % weight by weight (w/w), Stephenson Gobin Limited is obligated to provide sufficient information to allow safe use of the article including the name of that contained substance.

Substance: Lead

CAS/EINICS: CAS 7439-92-1 / EINICS 231-100-4

Brass, Aluminium, and Stainless Steel that are commonly used for the manufacture of our products and accessories.

The material grades: Brass CW614N or CuZn39Pb3 and Aluminium 6061-T6 (with and without T6), Aluminium 6082-T6 (with and without T6) or Aluminium 6282 T6 (with and without T6) contain concentrations of lead above the threshold of 0.1% w/w. Stainless steel 1.44.4/4 316L contains 0% lead w/w.

The product the customer handles is a solid, inert metal with lead at a low concentration. There is no release to the environment during installation or during the service life of the product, and the product poses no risk to the end user. In addition, the product is enclosed within a larger assembly, which encapsulates the material and therefore the small amount of lead content.
